ABOUT

Aspiring Full stack Developer with a passion for building dynamic and user-friendly web applications. I have solved over 160+ problems on LeetCode, which has sharpened my problem-solving abilities and DSA. I am dedicated to continuous learning and growth in the field of Full stack development, striving to create innovative solutions and enhance user experiences.
vist my portfolio Yashshiva.com

Skills

FRONT END: HTML,CSS, JAVASCRIPT, REACT JS, TAILWIND CSS, BOOTSTRAP, FRAMER MOTION
BACK END : NODE JS, EXPRESS JS, REST-API
DATABASE : MONGO-DB AND MY-SQL
VERSION CONTROL : GIT GITHUB
PROGRAMMING LANGUAGES: JAVA
TOOLS : REDUX TOOL-KIT , ZUSTAND, POST MAN

Work Experience

Softage.ai| Data annotator (Ahemdabad)   **Aug2023 - March 2024**
Contributed to the development of a large language model for Perplexity.AI by gathering and annotating data, ensuring high-quality datasets for model training.
Followed specific technical prompts to perform tasks accurately, demonstrating strong problem-solving skills and attention to detail.

Projects

FOOD DELIVERY APP   Live_link

Technologies Used: TAILWIND CSS, REACTJS, REDUX-TOOLKIT

- **THIS APP IS MADE USING REACT TAILWIND AND REDUX TOOLKIT**
- **RESPONSIVE, FETCHES DATA OF FOOD,**
- **FUNCTIONALITY : ADD TO CART, DELETE FROM CART, USER CAN SELECT FOOD FROM CATEGORY**
- **USER CAN SEARCH DESIRED FOOD ITEM**
- **USES REDUX-TOOLKIT TO IMPLEMENT SEAMLESS OPERATIONS**

E-COMMERCE WEBSITE   *link→*

Technologies Used: TAILWIND CSS, REACTJS, FIREBASE AS BACKEND, REDUX TOOLKIT, CONTEXT API

- **IMPLEMENTED REACT ROUTER, CONTEXT API AND REDUX-TOOLKIT's CONCEPTS TO OPTIMIZE APPLICATION**
- **USER FRIENDLY UI WITH MOBILE FRIENDLY RESPONSIVENESS**
- **FUNCTIONALITY: ADD TO CART , USER AUTHENTICATION,MULTIPLE ROUTES**
- **USES FIREBASE AS BACKEND FOR AUTHENTICATION**

URL Shortener Web Application   github

Technologies Used: Node js, Express js, MongoDb, shortId

- **Developed a RESTful URL shortening service using Node.js, Express.js, and MongoDB, enabling users to convert long URLs into shorter, more manageable links.**
- **Implemented a URL redirection system by generating unique short codes using the shortid library, allowing users to be redirected to the original long URL when accessing the shortened link.**

JWT Authentication system   github

Technologies Used: Node js, Express js, MongoDb, bcrypt

- **This project is a complete user authentication system build with Node express and mongodb**
- **Ith include user registration and login it has secure password authentication using bcrypt and JWT base token authorization**
- **Protected routes middle wares to verify JWT tokens and ensure certain access points to certain api endpoints**

Academic and Extracurricular Achievements

- **Solved 160+ problems on leet code**   *Profile link*
- **3 star on Hacker rank in java**

Education

Chartered Institute of Technology, Bikaner technical university ,India   **2019 - 2023**
- B.tech in Computer science   (CGPA :7.8)

Railway Sr Sec School, India   **2018 - 2019**
- *CBSE(Class XII)*
